

Mechanical seals for **PROPELLER SHAFTS**

Specific applications for boats and ships wherever reliable customised products are required.

Replacing stuffing boxes with mechanical seals eliminates wear on the propeller shaft, thus increasing efficiency.

Fluiten have vast experience in all aspects of technical design, and the production of mechanical seals for propeller shafts.

The seals are designed to tolerate shaft movement. No dry docking is required for maintenance.

Fluitens dedication to design and production ensures the most cost effective solution to a wide range of mechanical seals.

• Mechanical seal MU/MUS

• Mechanical seal MMS

Dimensions subject to modifications without notice.
Note: for inch dimensions please call our Technical Sales Office.

ELEMENTS:

- 1** STATIONARY SEAT
- 1a** STATIONARY SEAT INSERT
- 2** ROTARY FACE
- 2a** ROTARY FACE INSERT
- 4** SEAL BODY
- 7** DRIVE RING
- 9** ROTARY FACE GASKET
- 10** STATIONARY SEAT GASKET
- 13** SPRING
- 47** SEAL BODY GASKET

OPERATING LIMITS:

DIAMETER: (mm)	SPEED: (m/sec)	PRESSURE: (bar g)	TEMPERATURE: (°C)
095	10	2,5	+80
40	0	0	-5

CHARACTERISTICS:

- SMALL/MEDIUM PROPELLER SHAFTS
- RESISTANT **HIGH** SHAFT AXIAL MOVIMENT
- NO CATASTROPHIC FAILURES
- BI-DIRECTIONAL
- SPECIAL MATERIALS ANTI-CORROSION

STANDARD MATERIAL TABLE MU

STANDARD MATERIAL TABLE MUS

2a	1a	9 10 47	13 4 3 1 2	7
Z31	U41	G	E	B6

Materials:

- Y1: Cr-Mo Steel
- Z32: AISI 316+Graphite resins impregnated
- Z31: Graphite resins impreg.
- U41: Silicon carbide
- V: Viton
- G: Nitrile rubber
- N: Neoprene
- E: AISI 316
- B6: Marine brass

Example:

To order the seals shown on this page, no split version, for shaft 55 mm and standard material, the code will be: **MU055 - Y1Z32GEB6**

MECHANICAL SEAL MMS

ELEMENTS:

- 1** STATIONARY SEAT
- 1a** STATIONARY SEAT INSERT
- 2** ROTARY FACE
- 2a** ROTARY FACE INSERT
- 4** SEAL BODY
- 7** DRIVE RING
- 9** ROTARY FACE GASKET
- 10** STATIONARY SEAT GASKET
- 13** SPRING
- 47** SEAL BODY GASKET

STANDARD MATERIAL TABLE
